

Questions to ask your family about STEM
(science, technology, engineering and math)
in our lives & communities:

1. When you were growing up, what were you curious about that involved science, math or technology? Why were you curious?
2. Who is someone our family knows that does work that involves science, math or technology? How is science, math or technology part of what this person does?
3. In our family, what are some things we do that involves science, math or technology? How is science, math or technology part of this?
4. What are some of the needs or challenges that you think we have in our community?
5. How can science, math and technology help to address these needs or challenges in our community?
6. Do you think I should keep studying science, math and technology subjects in school? Why or why not?
