

Tarp Challenge

Materials:

1. Tarps that are approximately 6'x4' for as many groups of 5-6 students. There should be little room on the tarp but enough for students to maneuver easily.

To play the game:

1. Divide the students into groups of 5 to 8.
2. Give each group a tarp that is flat and ask them to all stand on it.
3. The challenge is to flip the tarp over without touching the grass.
4. If a player fall off the tarp and touches the grass then the group must restart with the tarp fully on one side.
5. First team on the other side of the tarp wins.
6. The "trick" is for all the team members to move to one side of the tarp, twist the other end over, and transfer team members slowly to the other side while flipping the tarp over.
